

WALKING IN MINNESOTA

Walking is a key part in how people move around, whether out walking the dog, going to school, catching the bus, or traveling through the parking lot.

Walking to Food

Going to School

Walking the Dog

Catching the Bus

Traveling Through
the Parking Lot

Walking plays an essential part in Minnesota's transportation system and is an important contributor to the health of our communities. Wherever people are going, and whether or not their using wheelchairs, strollers, or other devices, Minnesotans want and need safe places to walk.

STATEWIDE PEDESTRIAN SYSTEM PLAN

Pedestrian safety is a priority for MnDOT, and the Statewide Pedestrian System Plan will improve walking in Minnesota. The Plan will help to understand ways that MnDOT can make changes so that Minnesota is safer, easier, and more desirable for walking. The primary questions that the plan will address are:

How are pedestrian networks important to the state's transportation system? What is the benefit that they bring to the communities that they serve and to the state as a whole?

How can we prioritize investment on the trunk highway system?

In what ways can we translate this vision of walkable system into MnDOT-focused policy tools, implementation guides, and training opportunities?

WHAT THE PLAN IS FOR

The Statewide Pedestrian System Plan will guide MnDOT's investments to improve places for people walking along and across the state's highway system. It will help prioritize and create spaces that are safe and convenient for people to walk along and across state highways. It will also help MnDOT understand the role that the trunk highway system plays for residents and visitors. This will help guide future investment to continue to make walking more desirable and accessible.

Statewide Pedestrian System Plan

SCHEDULE

HELP GUIDE THE PLAN

Your participation is key to guiding this process!

There are a variety of way you can help us understand your expectations for pedestrian infrastructure on and along state highways.

We want to learn more about people's support for pedestrian improvements and which improvements, strategies, and policy ideas people support most. The Plan will prioritize pedestrian improvements, strategies, and policies based on public and stakeholder feedback.
